DETAILED ACTION

Election/Restrictions

Newly submitted claims 27-32 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 18-25, drawn to wrapping a blanket around a test piece inside a compartment and pressure testing, classified in class 102, subclass 303.
- II. Claims 27-32, drawn to mounting a test compartment on a lift assembly carried by a test vehicle, classified in class 73, subclass 37.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has separate utility such as pressure testing pieces that do not fragment. See MPEP § 806.05(d).

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 27-32 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

Claims 18-26 are allowed.

This application is in condition for allowance except for the following formal matters:

Presence of claims 27-32 to a separate and distinct invention under a restriction requirement

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
